

DORS60

With its double UV-light bulbs and the larger casing, the DORS60 is more convenient for customers who need a bit more room for checking large-size documents or for multiple user operation.

The DORS60 allows immediate recognition of a counterfeit by highlighting the presence of general luminescence in the background, luminescent UV marks, fibers, and the fragment of the images; complimentary to the DORS50.

FEATURES

- Plug and play installation.
- Instantly detects counterfeit notes.
- Mountable to the wall and still fairly compact, it can be placed anywhere around a cashier desk.
- Temperature protected to prevent overheating (OHSS).
- One year return to base warranty.
