

MACH3

With fast and efficient throughput, the Mach 3 features the highest coin sorting speed and compact size of any unit in its class.

The Mach 3 decreases coin processing time and increases accountability by ensuring the highest degree of accuracy.

Compact in size, the device has a built-in carrying handle and is portable enough to be transported and applied to any application.

FEATURES

- Glory's patented technology provides optimal and accurate counting and sorting at 1,500 coins per minute (CPM).
- Bag stops - three selectable bag stops per denomination. Ideal for small to medium volume venues.
- User selectable bag stops, batch and grand totals are accessed via a direct keypad.
- Two-line alpha-numeric display conveys operational messages at a glance.
- Lockout security function protects vital operating information.
- Limited moving parts and simplified electronics make the MACH 3 easy to maintain.
- Options include two RS232 serial ports (allow connection of the MACH 3 to cash settlement systems/workstations), PC computers configured to the unit, coin drawers, bag attachments, table top bagging pedestal, inspection pan magnet, printer, table top sorter.
