

MINI BPS

A Mini Bullion Pack System consists of a bulk coin feed hopper which, via a coin lift, feeds the two SC3003 coin counters fitted on the SC 9100H2 sachet machine.

The completed sachets are fed from the SC 9100H2 into an SC Bagger 9225P via a vertical sachet counter/elevator.

FEATURES

- The system can reach an output of over 1000 sachets per hour.
- The system portrayed to the left consists of a single-point-feeding bulk coin hopper and coin distribution conveyors, 6 x SC3003 Coin counters, 3 x SC9100H2s, 3 x Vertical Sachet Elevators and 1 x overhead conveyor, which in turn count and feed the sachets of coin into an SC Bagger 9250P.

Dimensions:

Width: 3,010mm

Depth: 3,000mm

Height: 2,700mm
