# NEWTON 3

The Newton 3 is a heavy duty two-pocket note counter designed to offer superior and fast note processing.

In addition to traditional note processing, the Newton 3 has an inbuilt clearance software and the ability to complete note clearance and TITO image at the same time.

The unit's real-time Serial Number Reading (OCR) and multi-currency processing also allows for advanced performance.

FEATURES

- High-speed Counting of 1,200 NPM and Reject Pocket Capacity of 100 notes.

- Advanced Counterfeit Detection - Dual CIS, UV, MG, IR, US sensors allow superior counterfeit detection and real-time serial number reading/imaging.

- User-Friendly - 4.3-inch colour touchscreen provides real-time data. Users can navigate the machine's functions via touchscreen and/or using the function keys around the screen.

- Full colour dual CIS system.

- Multi-currency - Can automatically detect and process up to 48 currencies at a time.

- Data transfer and networking via USB, LAN or Serial Port.

- Options and Special Features - Full colour image process, heavy duty processing, check and voucher and TITO scan, network solution (KBMS).
