

SC BIG BAGGER 9225P

The SC Big Bagger 9225P is used in conjunction with the SC Sachet 9100H2 as an aid to the operator in the bulk bagging of sachets. It is a fully automatic machine that fills and seals the big bag continuously.

The produced big bags are then transported via integrated conveyor belts for further processing (i.e. check weighing and labeling). It operates pneumatically and requires an electrical supply to power, air supply, 5.5 bar and 4 liters per cycle.

FEATURES

- Feeding speed: Up to 20 bags/minute, depending on coins per sachet and sachet per bag.
- Type of operation: Pneumatic, dry, clean air, 5.5 bar.

Dimensions:

Width: 860mm

Depth: 1,180mm

Height: 1,375mm

Weight: 380Kg
