

NC-7100

The NC-7100 is a high-performance 1+1 pocket sorter with superior counterfeit detection and note recognition technology, designed to quickly detect and sort notes by currency, denomination, orientation, and fitness.

The large display, serial number detection and overall performance make it the perfect solution for banking customers looking for a small banknote sorter that offers higher performance, great energy efficiency and better user experience.

SPECIFICATIONS

- Processing speed up to **1,100 notes per minute** (piece count). Detection mode 900 NPM
