

AST7000

The AST7000 is a cash recycling unit designed to handle the storage, safekeeping, and withdrawal of banknotes.

Robust, reliable and proven in the marketplace, the AST7000 is the recognised standard in cashier and back office management for the hotel, club and gaming environment.

On top of minimising discrepancies and CIT costs, the unit reduces cash on hand, and allows for extensive monitoring/reporting, providing full accountability and financial auditing to all channels of your business.

FEATURES

- Counts and dispenses banknotes at a speed of 7 and 6 banknotes per second, respectively.
- Equipped with 8 recycling drums, each with a capacity of up to 700 banknotes.
- Banknote recognition is performed by CIMA's BV 5000 sensor which employs the most advanced technologies: magnetic, infrared, fluorescence, ultraviolet, and visible light.
- C-Link software allows for remote monitoring and management of the device in real time.
- Time delays on payouts provide an effective deterrent to potential armed theft and hold ups.
- Can be used in conjunction with EFTPOS machines, providing cashier assisted functionality and reporting.
- When paired with the RCS 402 coin recycling system, the solution takes only minutes to complete float preparation and process end-of-day takings deposit, saving time and reducing HR costs.
- For ease of access, the frame has been conceived in a way that it can be completely removed therefore, maintenance can be performed without interrupting the teller's normal operations.
- Capacity: 5,600 notes (700 x 8 drums) in up to 8 denominations

Dimensions:

Width: 440 TO 495mm

Depth: 860 TO 1000mm

Height: 670 TO 737mm

Net Weight: 165Kg to 480Kg
