

NC3500

The NC3500 is a high-performance one-pocket value counter with advanced counterfeit detection and note recognition technology, designed to process large bundles of notes quickly and reliably.

The large display, user-friendly interface and consistent performance make it the perfect solution for any business or financial institution looking for a cash counter that offers high speed, reliability and improved user experience.

SPECIFICATIONS

- **High-speed counting** - 3 selectable counting speeds: 900/1,100/1,300 Notes Per Minute (NPM) when detection mode is off and 600, 900 and 1000 NPM with detection mode on
- **Advanced counterfeit detection** - UV, MG, and MA sensors for superior counterfeit detection
- **User friendly** - Full numeric key panel gives flexibility to set desired batch numbers and the combined functional keys provide an easier configuration, while the 2.8 inch LCD display with intuitive User Interface guides the user and provides real-time processing data
- **Easy to maintain** - For cleaning and in the unlikely event of a note jam, the note path is fully accessible thanks to the clamshell structure of the machine. Quick cleaning and issue resolution guides are provided with the machine
- **Multi-currency** - Can automatically detect and process up to 5 currencies at a time
- **Connectivity** - Data transfer, peripherals connection and software upgrades can be done via USB and RS-232 Serial Port
- **Optional peripherals** - Remote display and thermal printer

Dimensions: 285 W x 270 D x 280 H mm

Weight: Approx 7.2 Kg

Power Supply: 100-240V AC, 50/60Hz (40W Consumption)
