

SDM50 Note Deposit Solution

The SDM50 is a super compact banknote deposit solution designed to sit under the counter and allow small businesses to secure high denomination banknotes right at the Point of Sale.

Ideally suited for convenience stores, petrol stations, quick service restaurants, pharmacies and other small format retail environments, the SDM50 offers a simple design, quality, proven technology and an easy integration to your POS management system.

Notes are accepted through a single-note feed validator and secured in a self-sealing stacking bag of up to 1,200 notes capacity. Both note acceptor and bag compartment are easily accessible for cleaning and in an unlikely event of a jam. The detachable 7" touchscreen + printer + Dallas key module is designed to sit on top of the counter for convenience or to be replaced by your POS hardware completely.

HIGHLIGHTS

- **SUPER COMPACT SIZE OF 20 w x 49,5 d x 52 h cm**
- **FLEXIBLE INSTALLATION OPTIONS: SIDE, TOP OR FLOOR ANCHORING**
- **EXTRACTABLE NOTE ACCEPTOR FOR EASY CLEANING/ MAINTENANCE**
- **SPACE OPTIMISED BAG COMPARTMENT FOR MAXIMUM CAPACITY**
- **EASY INTEGRATION TO ANY POS PROVIDER**
- **DETACHABLE MODULE INCLUDING 7" SCREEN, PRINTER AND DALLAS KEY CAN BE REPLACED BY YOUR INTEGRATED POS HARDWARE**

PROVEN BENEFITS

REDUCE THE COST ASSOCIATED TO HANDLING CASH

No more double handling of cash and second or third count checks necessary. The machine counts, authenticates and stores small bundles of banknotes in a matter of seconds.

MINIMISE DISCREPANCIES AND HUMAN ERROR

The SDM50 Cashiers to validate and secure high denomination banknotes directly upon payment transaction. Counterfeit notes can therefore be detected and stopped immediately, before they get accepted as payment. Each transaction is logged in detail and immediately reconciled within your POS management system.

SECURE YOUR CASH

Less touch-points mean more security for your cash. Securing your banknotes immediately upon receiving them as payment significantly reduces the risk of robberies and maximise your staff's productivity, eliminating the need for long runs to the back office.

OPTIMISE YOUR CIT COLLECTIONS

Cash is secured in a self-sealing stacking bag, ready for CIT pick up and banking. The full pick up procedure, including printing a report of the contents of the unit, only takes a couple of minutes to complete. The SDM50 reporting system allows to monitor capacity and transactions by user. Alerts of reached capacity threshold can be automatically sent to a group of emails.
