

SC 93365

Coin lifts for feeding loose coins from a hopper to any kind of coin sorting, coin counting or coin packaging machine.

FEATURES

- Feeding speed: up to 4,000 coins per minute.
- Available with sensor control or directly started from the coin counter or coin sorter.
- Coin wagons are connected to the lift (the lift itself has no wheels).
- For personal safety the machine stops automatically if the operator tries to reach a coin while the machine is running, and the lift automatically stops if the wagon is disconnected from the lift during operation (sensor control).
- The lifting belt has flights made of wear resistant stainless steel. The vertical part has a transparent plastic cover which prevents coins from falling off and makes the transport easy to supervise.
