

IFX i400

The IFX i400 is a compact, high-speed multi-pocket sorter with TITO and clearance capabilities specially designed for gaming venues.

Significantly smaller, 39% faster, and more flexible than any other multi-pocket currency sorter, the IFX i400 can range from as little as 5 to a maximum of 17 pockets, offering a high capacity far more efficient, continuous processing of large quantities of notes and tickets at a speed of up to 1,000 notes per minute.

A custom-made PC module with touch-screen, printer, and barcode reader can be integrated to speed-up and optimise the clearance process even further.

FEATURES

- Large hopper accommodating 1000 notes/tickets at once.
- High speed currency counting and processing: counts, sorts, orientates and faces at an adjustable speed of 600, 800 or 1,000 notes per minute.
- Increased number of stackers offer a high capacity for more efficient, continuous processing of large quantities of notes/tickets.
- Configurable pockets - all pockets can be used for sorting of all denomination or strap preparation. One or two reject pockets can also be assigned to maximise throughput.
- Features the most advanced counterfeit detection sensors in the industry, plus a double verification path so that each banknote is checked twice.
- Front access to the entire note path and full on-screen user guidance and diagnostics allows for a quick and easy jam resolution with minimal impact on processing.
- Easy to use: Change processing modes with the touch of a button on an 8" color touch-screen display. Option to show only the buttons needed for daily operation.
- Easy to upgrade: upload with a software activation key as new features become available.

Dimensions (3-pocket configuration):

Width: 737mm

Depth: 432mm

Height: 381mm

Weight: From 40Kg
