

MACH9

The Mach 9 is a high-speed coin sorter applicable to financial processing centres, vending companies and gaming houses where throughput and reliability are paramount.

Like other units in the Mach series, this unit uses a patented sorting system for trouble-free operation and unrivaled performance, while an easy-to-read backlit graphics display provides clear function status and operational messages.

FEATURES

- Glory's patented technology provides optimal and accurate counting and sorting at 4,500 coins per minute (CPM).
- Inspection pan capacity: up to 5000 coins.
- The Mach9 allows to user to select from 3 individual bag stops, batch and grand totals with ease using a direct keypad.
- When in use, a two-line alphanumeric display clearly conveys operational messages while a lockout security function protects vital operating information.
- Offers coin authentication option, utilising Glory's patented WAVE sensor technology.
- Can track and consolidate management information, eliminating the need for manual reporting.
- Notes can be entered manually or automatically transferred if a note counter is interfaced, ensuring a comprehensive audit trail.
