

SCW-20 SERIES

Building upon decades of coin processing expertise, the SCW-20 series is a third generation coin sorter designed to meet the needs of customers across a broad range of applications.

Aimed at medium size bank branches or cash centres, retailers, transportation hubs or anywhere coin is accumulated, SCW-20 provides a fast and efficient method to count, sort and authenticate.

FEATURES

- Auto-feed hopper to make the entire process faster, easier and more efficient.
- Equipped with a new authentication sensor, HGMS-10, designed to meet current regulations.
- Two variants available, with and without authentication.
- New auto-feed hopper is available with either variant.
- 7" full colour touch screen provides easy to read coin bag status and diagnostics.
- Simplified keypad, three primary use buttons for fast operation.
- Customize configuration choosing from coin drawers or coin bags.
- For high volume coin bag applications, choose from bag accessible or tamper evident secure machine stand.
- Ports for optional printer, remote display, bar code reader or other interfaces included.
- Functionality: Up to 8 denominations + 1 reject (Authentication Variant).
- Processing speed: Up to 3000 coins per minute.
